Bad Design:

Good Design:

Fig : Good Design

Explanation:

The good design has all the elements placed in the right position where are in the bad design the login , the logo, user name , password and the next button are all placed in the wrong place , this is not how a traditional login page is which makes the user confused and does not sync together .Hence it is a bad design .

Result:

Hence the introduction to figma with good and bad design has been successfully studied and executed.
